

STONE COUNTY HEALTH DEPARTMENT  
FOOD SERVICE INSPECTIONS

2/2/11– 2/28/11

The health department divides food service code violations into two categories, critical and non-critical.

**Critical violations** are more likely than other violations to contribute to food contamination, illness and/or injury.

**Non-critical violations**, although important to the overall aesthetics and food safety of the establishment, do not necessarily present an immediate threat to food contamination, illness and/or injury.

A report for each establishment that is inspected shows the number of critical violations, along with a short statement as to the nature of the violations. The report also indicates the number of non-critical violations but does not list the nature of these violations.

\*=Items corrected immediately.
